

# Baltic Earth Workshop on Multiple drivers for Earth system changes in the Baltic Sea region

Tallinn University of Technology, Tallinn, Estonia  
26-27 November 2018

Co-organized by Helmholtz-Zentrum Geesthacht,  
Leibniz-Institute for Baltic Sea Research and Tallinn University of  
Technology in collaboration with BONUS, HELCOM and ICES

The workshop intends to bring together experts in the different drivers for regional Earth system changes in the Baltic Sea region to discuss achievements and prospects in research on the interdependencies between the different natural and man-made drivers, with the aim to assess the state of knowledge and develop strategies to alleviate detrimental effects on the environment. The workshop is organized in collaboration with BONUS, HELCOM and ICES. A tentative goal is to elaborate particular topics for further research. International renowned speakers have been invited for an interesting programme.

## Call for Posters

Poster contributions are invited. See the website for a list of topics. We would like to focus on interdisciplinary linkages, interrelations and feedbacks between these different drivers, and the changing climate. Contributions that take into account these linkages will be preferred.

**Registration and Poster Abstract Deadline**

**29 October 2018**
